

A Superior Alternative to Wood

Cost-effective and environmentally friendly, Alice® Direct-To-Glass Printing gives you the benefits of wood and none of the maintenance.

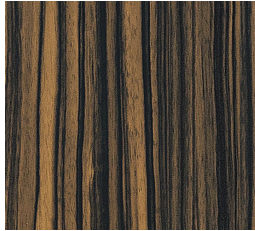

SEE WHAT
GLASS
CAN DO
GGI

Design Flexibility

Alice® gives us the ability to control the consistency of the wood grain.

- Control of grain color, design, and pattern
- Control of opacity level, from translucent to opaque
- Easily create vision area and daylighting
- Backlighting for dramatic effect
- Color match of wood grains to complement design aesthetics
- Use monolithically, laminated, or as part of an insulating glass unit configuration

Standard Design Options

Zebrano Espresso

Zebrano Macchiato

M390-1

M390-2

Sustainability

Alice® is environmentally friendly and ideal for interior and exterior applications.

- Allows designers to mimic the aesthetic of exotic and endangered wood species
- Can be incorporated into insulating glass units with low e-coatings for improved energy efficiency
- Can be used to control daylighting and solar heat gain
- Unlike wood, glass can't easily catch fire and is considered a non-combustible material

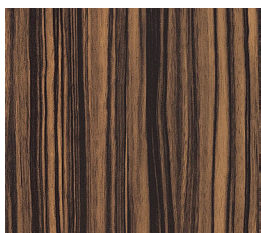

These samples serve as a demonstration of our design capabilities and are not heat-treated.

No Maintenance

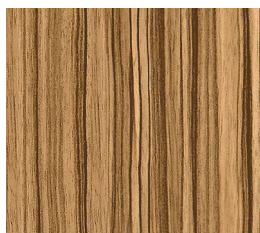

Alice® Decorative Glass Solutions are easy to clean and require no ongoing maintenance.

- Same cleaning process as traditional glass
- No special care or cleaning solutions required
- No limit to how often it can be cleaned and disinfected
- No sanding or refinishing required
- Can be exposed to heat, humidity, and moisture without shrinking or swelling
- No chemical treatments required to protect from insects and fungi

Custom designs and colors available on clear, low iron or satin etched.

Zebrano Chocolate

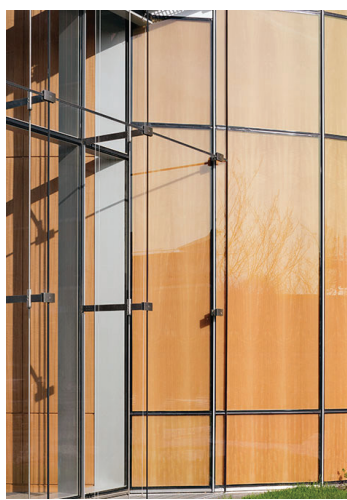

Zebrano Mocachino

M390-3

TH-1

Durability

Alice® Direct-To-Glass printing is designed to withstand both the elements and the test of time.

- Suitable for exterior and interior applications, including building facades, without concern of fading
- Resistant to weathering, mold, and other forms of degradation
- Eliminates humidity and other moisture issues
- No fading, warping, splitting, or buckling
- More hygienic, durable solid surface material

Full-size sample is available upon request for a true representation of quality and aesthetic.
