

KODIAK™ 10-45

FLAT POLISHING & MITERING MACHINE

The Kodiak™ 10-45 Glass Polishing and Mitering Machine features a variable angle of up to 45°, making it the optimal solution for polishing and mitering large, flat surfaces. Heavy-duty spindles and frame construction are designed for continuous use.

designed specifically with North American fabricators in mind. Featuring a line-up of glass edging, polishing, beveling and mitering equipment, Kodiak machines offer exceptional edge quality, competitive production speeds and a proven track design to help you redefine performance. Backed by a team of 23 highly-trained US technicians.

Kodiak is an exclusive line of glass edging equipment brought to you by HHH Equipment Resources and

Product Features & Specs

Track Elements

Cast aluminum caterpillar track system and gears provide high precision and long life.

Electrical Control

CE/UL-certified machine with trusted, quality performance.

Display Screen

10" screen displays glass thickness, machine speed, lubrication time and more.

Automatic Lubrication

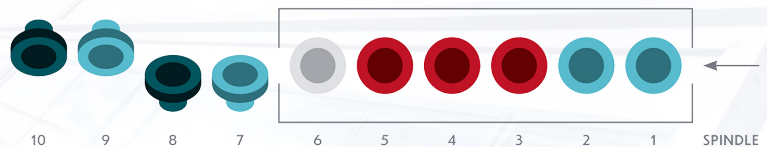

Centralized oiling device makes it easy to keep the machine lubricated.

Industry-Leading Warranty

18-month mechanical, 12-month electrical warranty.

Glass Thickness	3 - 30 mm
Arris Max	5 mm
Conveyor Length	2400 mm std.
Conveyor Capacity	1000 kg
Weight	5800 kg
Std Vertical Rack Height	2000 mm
Working Height	825 mm
Machine Dimensions	8600 x 1400 x 3000 mm
Power	27 kW
Minimum Glass Size	60 x 60 mm edging (150 x 150 mm Mtr)
Amps (Under 480V, 60 hz Power Supply)	58.34A
