

Ariplak® ZenSilver

Stunning Exteriors

The newest addition to the Ariplak® coating range by Ariño Duglass, Ariplak® ZenSilver offers architects and designers more freedom than ever to create stunning and unique glass facades.

Comfortable Interiors

With 47% exterior light reflection and only 6% interior light reflection, Ariplak® ZenSilver has a beautiful silver tone on the exterior with a neutral black tone on the interior. This makes it possible to create reflective facades without compromising on outward visibility.

Ultimate Design Freedom

ZenSilver expands on the DecometalReflec range by Ariño Duglass, the innovative decorative glass style with reflective metallic designs.

ZenSilver maintains the reflective metallic appearance of DecometalReflec, while adding comfort and neutrality to interior spaces.

Ariplak® ZenSilver

Facades

ZenSilver can be applied on tempered, laminated and insulated glass. It can also be combined with other Ariplak Low E-SP coatings, providing total flexibility in facade design.

Bird Friendly

ZenSilver can be used to create bird friendly glass, in standard or custom bird friendly patterns.

Technical Values

6MM CLEAR, ZENSILVER SURFACE #2 (100%)

Visible Light Transmission (tv %):	1.2%
Visible Light Reflection	
• Exterior (rv % out) :	47%
• Interior (rv % in) :	6.3%
