

SPECIALTY LABELS FOR GLASS & TEMPERING

WITH ULTRA REMOVABLE ADHESIVE

Our glass labels now made with *Ultra Removable Adhesive* which leaves no glue or any kind of residue behind. These labels can be put on and taken off many times cleanly and efficiently. It's a new Paradigm for thinking about glass labels. Ultra Removable adhesive labels available through Best Print Solution are extremely easy to work with. They're easy to apply and easy to remove. Unlike regular low-tack removable adhesive labels which either don't adhere properly or are almost impossible to remove, these labels go on and stay on until you're ready to remove them. Apply and take off the same label over and over again. Our Ultra Removable Labels come as direct thermal, thermal, fanfold or sheeted. For direct thermal or thermal labels they come with either a 1" or 3" core. Labels can be plain or custom printed to your specifications.
